GRADUATION THESIS BACHELOR OF ENGINEERING IN INFORMATION TECHNOLOGY (HIGH-QUALITY PROGRAM)

Build An E-commerce Website To Sell Books

Student: Quach Long Ky Vuong

Student ID: B1809729

Class: 2018-2022 (K44)

Advisor: Dr. Lam Nhut Khang

ACKNOWLEDGEMENTS

To successfully complete this Information Technology Project – Fundamental Topics, I would like to thank Dr. Lam Nhut Khang dedicatedly guide and support me throughout subject implementation.

At the same time, I would also like to thank the teachers of the Faculty of Information and Communication Technology has dedicated to teaching, imparting valuable knowledge to me cumulatively worked on the topic in the past semesters. Despite trying to complete the subject as best as possible, but still did not shortcomings can be avoided. We look forward to the comments of teachers and friends.

Sincerely.

Can Tho, May 23th 2021 Student implement

Quach Long Ky Vuong

ABSTRACT

Reading book is important because it develops our thoughts, gives us endless knowledge and lessons while keeping our minds active. Books can hold and keep all kinds of information, stories, thoughts and feelings unlike anything else in this world. The importance of a book to help us learn and understand things cannot be underestimated. Reading book is a timeless form of entertainment and information. Nowadays, going to and buying books at stores is quite inconvenient. For example, you hardly know which book to buy or the contents of the book. But a website can help you solve that problem. You can view books with high likes, read descriptions first to decide whether to buy it or not.

Building an e-commerce website to sell books that users can easily access and buy the books they want easily. Shoppers can preview a portion of the book. It saves shoppers time. Website is built with easy to use interface for customers. This website developed with PHP, CSS, HTML, JavaScript and database is MySQL

CHAPTER 1: INTRODUCTION

1.1 Problem

Nowadays, going to and buying books at stores is quite inconvenient. For example, you hardly know which book to buy or the contents of the book. But a website can help you solve that problem. You can view books with high likes, read descriptions first to decide whether to buy it or not.

1.2 Purpose

Building an e-commerce website to sell books that users can easily access and buy the books they want easily. Shoppers can preview a portion of the book. It saves shoppers time. Website is built with easy to use interface for customers

1.3 Object and scope of the study

The website is created to cater to everyone, especially book lovers. help people to access useful books in a convenient way.

1.4 Solutions

Theoretical basis: knowledge of DBMS MySQL, PHP, HTML, CSS, Javascript, ...

1.5 The functionality of the site

1.5.1 Customer

Login/logout

View product

Search product

Cart

Add product to cart

Check out

1.5.2 Manager

Login/logout

Manage product

Add new product

Update product

Delete product

View order detail

View account user

USER MANAGEMENT

Image 23 Manage account user

CHAPTER 3: CONCLUSION

3.1 Result

"Website Selling Book" has reached the goal, created a friendly user interface and easy for user with features such as view product, search product, and cart. With a manager, we have features like manage products (add, delete, update), and manage orders (view orders details).

After this project, I know how to create a website, design UI for website reasonable.

3.2 Restrict

Because I just started designing a website, the interface is still simple and not beautiful.

Website just selling smartphone.

Some features are limited.

3.3 Future work

Improve user interface of website responsive for IOS, and Android.

Integrated online customer care feature.

Integrated statistic for manager.

Variety for website.
